Lancaster Farming

VOL. 11 NO. 50 | Lancaster Farming, Saturday, November 12, 1966 | $2 Per Year

SPEAKERS AT AG-INDUSTRY meeting were, from left, George W Davis, Wheeler McMillen, and Samuel Dum. The banquet meeting, sponsored by the Lancaster Chamber of Commerce, replaces the former Business-Farm Day which was conducted by the Chamber over the past five years. L. F. Photo

Former Editor Predicts Changes For Agriculture

With the barber shop quartet strains of "How Ya Gonna Keep 'Em Down On The Farm" still ringing in the hall, a former editor of national prominence told some 300 Lancaster Countians Thursday evening about some of the changes that were driving youngsters away from farming, and cited others that would help make farming more profitable in the coming years

Speaking at the agriculture-industry dinner meeting sponsored by the Lancaster Chamber of Commerce at the Dutch Town & Country Inn, Vintage, Wheeler McMillen charted the progress made by American agriculture since the country's founding in 1789 He pointed out that progress in America, during the brief period of three short lifetimes since we became the United States of America, parelleled progress in American agriculture.

An Ohio-born farm boy, McMillen spent most of his life in the field of communications, rising to editor-in-chief of the Farm Journal, a national farm publication.

In praising American agriculture, McMillen said that "we've created a PATTERN for

F & H Directors Vote To Build Entire Center

The proposed Farm & Home Center will be built in its entirety, it was announced this week by Farm & Home Foundation publicity chairman John H Herr

At a recent meeting, the board of directors decided to proceed with the entire project now, rather than building only the office section now and adding the general purpose meeting room as funds permitted

Although public response to the Foundation's recent plea for additional funds did not quite match the latest "challenge" gift of $25,000, the board was sufficiently encouraged to proceed with plans for the Center Financing in the amount not contributed by public pledges and contributions is presently being arranged with the Conestoga National Bank, Lancaster, Herr said

Some details on the construction project are still under discussion with low-bidding contractors, but it is anticipated that these differences will be resolved in the next few days The Foundation's board of directors will then meet to

Milk Co-Op Sets Annual Meeting For Nov. 15-16

Local dairy farmers, who are members of the Inter-State Milk Producers' Cooperative, will send delegates to represent them at the 31st annual meeting of the bargaining cooperative in the Benjamin Franklin Hotel, Philadelphia, November 15 and 16, the Cooperative announced this week

The program, geared to dairy farmers and their problems, will feature Drew Pearson, noted writer and corres-

County Group Title Returns To Lancaster At Livestock Exposition

Lancaster County youngsters had to be contented with two titles in this year's junior steer show at the 10th Pennsylvania Livestock Exposition at the Farm Show Building, Harrisburg.

Their biggest win came at the conclusion of Monday's show when they regained the County Group of Five title with a classy looking Angus group shown by Donald Muller, Elizabethtown R1, Sharon Weaver, New Holland R1; Robert Donough, Mount Joy R2, C William Frey, Quarryville R2, and Lynn Heistand, Manheim R4

The county group title had nearly become a private possession for Lancastrians until last year Prior to the 1965 show, the title had gone to a Lancaster entry for the eight consecutive years the Exposition had been operating

Third in the county group class last year, Lancaster 4-H Beef Club members this year placed above clubs from York, 2, Chester, 3, Dauphin, 5, and Lebanon, 6 Fourth place went to an Ohio club

The reserve Angus title, the highest win by a Lancaster County youth in the individual junior steer competition, went to a summer yearling shown by C William Frey Frey's steer, "Mickey," stood second in its class to a Richard Rushel, York County, entry After looking over the 60-plus Angus steers in the show, judge Val Brungardt of the University of Wisconsin's animal husbandry department, went with the same combination—Rishel and Frey Another Frey steer, a senior calf, won its class to provide the only first-place ribbon for a Lancaster County entry

Rishel's Angus went on to win the reserve champion steer title in the junior show, the top win going to a summer yearling Hereford shown by David J Greenbarg Jr of Montgomery County In the open class steer show on Tuesday, Greenbarg exhibited his steer to the number two spot

County ACP Allocation At $110,000 For 1967

The Lancaster County Agricultural Stabilization & Conservation Service noted this week that enrollment is now open to county farmers for the 1967 Agricultural Conservation Program.

This year's allocation of $110,000 is available to farmers who may wish to take advantage of the cost-share assistance features of the program.

The 1967 program is prac-

Young Farmers To Hold Annual State Convention Nov. 15 At PSU

"Act Alive Today, Be Alive Tomorrow" is the theme for the Seventh Annual Convention of the Pennsylvania Young Farmers Association, to be held November 15 at Penn State University. All meetings will be held in the Keller Building with a banquet in the Nittany Lion Inn

Featured speaker will be Warren G Weiler, State Supervisor of Agricultural Education in Ohio The Honorary Young Farmer Award will be presented to George D Derr, of Harrisburg, past adviser to the Young Farmers Association and former assistant supervisor of vocational agriculture in Pennsylvania.

Delegates from 40 statewide chapters will be welcomed to the campus by Dr David R McClay, head of the department of agricultural education at Penn State. Handling local arrangements for the convention committee is Dr. Gene M Love associate professor of agricultural education

Presiding at the opening ceremony at 10 a m will be president Paul Kline, Lititz R3 The invocation will be given by Jay Dilts, vice president of Region 5 Certificates and pins for retiring officers will be presented by H Brinton Gerhart, advisory council

From Where We Stand . . .

Public Opinion On Cut-Rate Milk Prices

We know that the image of the farmer in the consumer's eye is not good. Speakers at farmer banquets and meetings for the past several years have been saying we must improve that image or suffer the consequences of more stringent federal control over farm product prices.

The average consumer probably knows that milk is produced by cows, not by supermarkets, although there's some doubt whether the next generation will be even as well informed! But the average consumer has no idea of the problems on the input side of milk production. They don't know, for example, that the advancing costs of producing milk, eggs, pork, or whatever, have continued to undermine even the best farm prices in recent years. If the price of milk goes up a cent, consumers generally figure the increase goes right into the farmers' pockets. It will be a long, up-hill fight to educate consumers on some of these food problems, and to show them that the extra services they have demanded on the processing and retailing end of the food chain accounts for most of the price increases which they protest.

This point was highlighted this week, when, on the way to the Livestock Exposition in Harrisburg, we caught the tail-end of a radio man-on-the-street broadcast. The interviewer was asking the people what they thought of the cut-rate prices being offered on milk by two retail stores in the Philadelphia area. And, after telling them that the price of milk was controlled in Pennsylvania, asking if they approved of milk price controls.

The interviewer was thinking of control on milk prices in the normal consumer sense of price controls — that is, as a lid rather than a support Consequently, he had the people he talked with as confused as most of us are on this milk price situation

Most of the people said they would certainly buy the 79-cent per gallon milk being offered in preference to paying the $1.06 price for milk prescribed by the Pennsylvania Milk Control Commission To the second part of the question, however, all agreed the price of milk should be controlled, and favored a state commission to do this!

But to illustrate the point that farmers can get their message to consumers, one woman interviewed said she would **not** buy the cut-rate milk because she felt that it would hurt the farmer. She said farmers have to work hard for their money and anyone selling milk that cheap would eventually be taking money out of the farmer's pocket.

What this interviewer failed to make clear, however, was that PMCC controls the minimum price at which milk may be sold in Pennsylvania; competition and supply-demand control the maximum price.

What the final outcome will be of this challenge to the authority of PMCC by the two milk firms involved, we don't know. The courts will have to decide that. It would seem that without the Commission, or some comparable state authority, the situation could get really chaotic in a hurry. On the other hand, the present supply-demand conditions on milk would probably discourage much actual price-cutting.

The Commission seems undoubtedly the best answer at the moment, but the long range solution to milk — and all food prices — lies in better communication and understanding between farmer and consumer.

Great Society Backlash

Now that the elections of 1966 are in the record books, all the analysts are busy trying to interpret the results. What does this tremendous resurgence of the "out-party" mean in national terms?

While it is undoubtedly true that the Negro civil rights cause pushed aside a lot of friends through the irresponsible behavior of a minority of city-dwelling Negroes . . who even overran the moderate leaders of their movement . . . we can't see the white "backlash" theory accounting for the GOP landslide. Of course it was an important factor in some area races, especially those hosting the summer riots . . . California and Illinois, for example.

But rather than white backlash, we see Great Society backlash as the voting opinion expressed by millions of Americans this week.

We think very definitely the voters have said to the Great Society, "Enough, already!". Much of the G. S. legislation passed by the 89th Congress did so by slim margins. A gain in House seats of 47 by Republicans has whittled the Democratic majority to its lowest point since 1956. A net gain of three senators and eight governors for the GOP certainly adds credence to the theory that Americans are fed-up with the whole free-wheeling Great Society business.

How severely this rebalancing of representation will restrict President Johnson's legislative and spending plans will depend to a great extent on the political and economic philosophies of the new electees. Simply because they are Republicans is no guarantee of their conservatism, but some polling of the individual opinions of these new Congressmen seems to indicate trouble for LBJ's plans. We surely hope this will be the case, and that the 90th Congress will succeed in restoring a little fiscal sanity in Washington and in the nation.

The Unarmed Victor

Lesson For November 13, 1966

Background Scripture [illegible]

Devotional Reading [illegible]

The opponents of truth always seem to be by far the better-armed warriors. The foes of Paul and his gospel had the whole weight of the Roman Empire and the Jewish nation behind them. Galileo was a tiny minority of one before the combined colossus of Church and State. While volume after volume was thrown upon the sinister bonfires of Nazi Germany, no one seemed able to oppose Hitler's brown-shirted legions.

Rev. Althouse

So it was when Judah's King Jehoiakim determined to silence the troublesome prophet Jeremiah, and his prophecies. All the power seemed arrayed against truth, its few friends impotent to carry on the fight. Jeremiah, the king ruled, was forbidden to speak any longer in the area of the temple.

More Than Prudent

A prudent man would have quit right there, but Jeremiah was more loyal to his God than prudently responsive to good reason. Forbidden to speak the truth in public, he wrote it on a scroll and gave it to Baruch, his secretary, to read before the ministers of the king. Equally resourceful, the king cut the scroll into strips and contemptuously burned them. Undismayed, Jeremiah wrote his prophecies on another scroll. Scrolls and books may be burned, but truth, no matter how impotent it may seem in its own self-defense, will be the ultimate victor!

In Pasternak's novel, **Doctor Zhivago,** Uncle Kolia protests that what man needs is not suppression by force, not the lion tamer with his whip to hold down "the beast who sleeps in man." To the contrary, he says, "... what has for centuries raised man above the beast is not the cudgel but an inward music: the irresistible power of unarmed truth, the powerful attraction of its example."*

(C 1958 by Pantheon Books, Inc., N. Y., Div., of Random House.)

Truth may appear to be unarmed — and it is in the usual sense of what we mean by "arms" and "weapons" — but it perseveres with an irresistible power over which no man, nation, civilization can ultimately prevail. We may silence the prophets, may burn their books, we may crush truth to earth again and again, but it will rise again and again and again because it is God's truth.

To Suffer A Season

Men of courageous loyalty, therefore, will link themselves to unarmed truth and suffer with it for a season, even a lifetime, because they know it must ultimately prevail in God's good time. Woodrow Wilson once said, "I would rather fail in a cause I know must ultimately succeed, then succeed in a cause I know must ultimately fail." A farmer put it more picturesquely: "I'd rather chase a rabbit and not catch it, then chase a skunk and catch it." Better to suffer with and for the unarmed truth than prosper with the powerful lie. Truth may seem to stand alone, a frail, impotent creature, but behind truth there stands the awesome power and purpose of God. That is why in the long run this unarmed warrior is the victor.

Friends of Abraham Lincoln advised him not to make a particular speech during his unsuccessful bid for the United States Senate in 1858. The speech, though true, would be harmful to him, they said. But Lincoln would not agree: "If it is decreed that I go down because of this speech, then let me go down linked to the truth."

The friends of truth must be willing to "go down linked to the truth," to pay the price this friendship may require. Jeremiah was such a friend, so was Baruch, and so were the king's ministers who bravely carried to him the forbidden scroll. The contents of the scroll would likely infuriate him and jepoardize their lives, but, confident that truth would ultimately prevail, they were loyal friends of this unarmed warrior.

promotion was J Mowery Frey Jr, 401 Beaver Valley Pike, Lancaster. Daniel Stoltzfus, Mount Joy R1, was reelected secretary, John Kreider, 523 Willow Road, Lancaster, was elected treasurer to succeed Daniel Martin, Manheim R1, who retired from the board

Paul Zimmerman, Ephrata R1, along with Kreider and Frey, were the new directors elected during the business meeting.

Some 280 members and friends of the association heard George J. Morgan, Attorney-at-Law, speak on some of the problems and laws pertaining to wills and property ownership "Whether or not you pass on more of your hard earned money to your children will depend on how you work with the tax laws," he said

Morgan urged everyone to make a will "Even if you just make a simple one, you save money," he said "And, if you have a will, you can say how you want it Otherwise, the state has a law that will disperse your property for you, but it may not be done the way you would have wanted it So get a will," Morgan said

Nelvin Empet, fieldman for the Pennsylvania Holstein Association, told the gathering that the 206 herds enrolled in the recent classification program conducted in the Southeastern district was the largest such program in the country Eighty of these herds were in Lancaster County, Empet said

Other speakers on the program included Miss Carol Hess, Lancaster County Dairy Princess; Elam Bollinger, chairman of the junior project committee; and Elvin Hess, Jr., state director.

President Clarence Stauffer served as master of ceremonies

Lancaster Farming Ads Pay !

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Check Farm Agreements

Partnership agreements between landlord and tenant should be checked annually to operate in a satisfactory manner This will remind the partners of their obligations and provide a chance to evaluate the various terms to see that they are doing the intended job. Agreements in writing eliminate many misunderstandings.

To Vaccinate Heifer Calves

A herd of cows with some resistance to Bang's Disease is preferable to one without any attempt to prevent the disease. Young heifers should be vaccinated when about 4 month of age to get the greatest amount of resistance with the least amount of undesirable reactions. Don't run the risk of not vaccinating.

To Finish High School Education

Every once in a while I come in contact with a teen-age lad who has quit high school and wants to become a farmer. There are many reasons why a student may not like school and want to drop out, but not any of them are good enough to justify the failure of getting a high school education as a teen-ager With the strong competition for educated and trained people now and in the future, the high school diploma is the foundation for any career.

To Protect Evergreens

Freezing weather and cold winds will soon be here and the evergreen shrubs may need some protection. A good ground mulch to prevent sudden changes in temperature will help protect the roots; this is especially true of plants that will get the winter sun Screens of burlap, canvas, or wood will break the strong winds and keep out the sun rays during the winter. The moisture conditions of the soil should be very good at this time, and if the plants are protected as listed, there should be a minimum of winter injury this year.

EARN MORE MONEY FROM YOUR STEERS THIS YEAR!

Your feed lot is the key to profits. Here's where top quality supplements priced for economical weight gains pay off. Here's where Red Rose feeds win friends.

RED ROSE

32 BEEF CATTLE SUPPLEMENT

This is the supplement you will want to use as a mixing ration for your home-grown grains or as a protein supplement to balance the feeding of low protein roughages.

RED ROSE

50 BEEF CATTLE SUPPLEMENT

Mash form. Nutrient fortifications are double the levels of 32 Beef Cattle Supplement.

Available with or without Diethylstilbestrol.

YOUR COWS NEED MINERALS!

RED ROSE

FREE-CHOICE MINERAL

Provides a complete range of minerals in balanced amounts.

When you feed Red Rose Free-Choice Mineral your cows will be protected against mineral deficiency, and at the same time assured good herd health — and will perform better in the milk line.

DON'T FORGET . . .
Your hogs will become pork FAST when you raise them on

RED ROSE

SWINE FEEDS

Red Rose "Litter to Market" feeds are the feeds you need to start your pigs — and feed them all the way to market time These feeds have been scientifically developed to reduce the cost of producing pork by converting more of the feed into good solid meat. Your pig profits will start when you place Red Rose Swine Feeds in your feed troughs. Start to use them now.

Red Rose HORSE FEEDS

You'll find coupons in every bag of Red Rose Horse Feed, Super Horse Feed, Classic Horse Feed, Equinadet Feed Supplement, and Lancaster Horse Pellets . . . good toward free Johnson Rope Halter
Feed Red Rose Horse Feeds and **take the worry out of feeding!**

Here is the feed you need for your herd!

RED ROSE

14 TEST-COW FEED

This is an all-purpose herd feed — for milking cows, calves, and bulls. It is very palatable, high in fat, minerals and digestible nutrients . . and can be fed at all seasons Red Rose 14 Test-Cow Feed is the dairy feed you have been looking for Try it . . . . and you'll use it always

THESE HEALTHY LOOKING HEIFERS HAVE ROUNDWORMS.

Protect your herd and your profits by feeding Red Rose Cattle Wormer with Thibenzole.

Over 85% of all dairy herds and 9 out of 10 beef cattle herds surveyed are infected with roundworms. Roundworms drain off blood and steal nutrients which slow growth and result in lower milk production. And worms keep beef profits down, too. Red Rose Cattle Wormer with Thibenzole cleans out parasites safely, effectively in just one feeding. Follow the lead of your neighbors, feed Red Rose Cattle Wormer to your dairy and beef herds.

Ask us. We have all the details.

THIBENZOLE is the registered trademark of Merck & Co., Inc., for thiabendazole.

Packer Feeding Of Livestock Hit By USDA

In a report released this week, the U S Department of Agriculture said that the feeding of livestock by meat packers can have a depressive effect on prices at livestock markets

The report was based on a study conducted by USDA's Packers and Stockyards Division which showed that at one of the nation's top 10 terminals, the prices for Choice grade steers actually ranged from 25 to 50 cents per hundredweight lower under the varying influence on packer-fed cattle used to fill slaughter requirements

A given increase in packer-fed supplies used for slaughter had more than 10 times as much effect on the local market prices as the same increase in market receipts, USDA said.

The market analysis is based on packer feeding by one slaughterer buying at the sample terminal market in 1962. Packer feeding accounted for about three percent of the cattle slaughtered by packers located near the market The primary packer-feeder in the area fed about 10 percent of its total cattle slaughter

Data on movement of cattle during the weeks throughout the year showed no evidence of packer-fed cattle consistently being used to stabilize variations in market receipts.

In tracing the growth and development of packer feeding, the study indicates that in 1965, 11 5 percent of all fed cattle marketed — more than one in every 10 — were fed by a packer or a packer-associated interest

Packer feeding accounted for about one-fifth of the fed cattle marketings in the West and South in 1965, although packers or packer-associated interests in the North Central States fed a third of a million head of livestock last year, the number represented only 3 3 percent of the fed marketings in the area, USDA stated

The study shows the leading states in packer feeding of cattle in 1965 were California, Colorado, Texas, Washington, Kansas, Arizona, Florida, and Nebraska

The study also includes a theoretical analysis of possible effects of packer feeding in various competitive market structures.

Donald Miller Shows Reserve Junior Lamb

In the junior market lamb competition Monday at the Pennsylvania Livestock Exposition, Harrisburg, Donald Miller of Elizabethtown R1 won the reserve champion lamb title with his lightweight entry

Miller had first and second place ribbons in the lightweight class, and placed third in pen of three lambs

Another Lancaster Countian, Ronald Meck, Reinholds R1, placed second and sixth in heavyweight market lambs, and fourth in pen of three competition.

● Agr.-Industry

(Continued from Page 1)

the conquest of hunger." He predicted that any under-developed nation in the world which could apply our formula for the development of such a pattern would cease to become an under-developed nation within a few short decades.

"But basic to our success as a nation," McMillen stated, "is our constitutionally-guaranteed Right To Choose." Call it what you will, he said, free enterprise, democracy, whatever: our basic right to choose how we spend our money and our lives "is a heritage shared by no other nation on earth We must never abandon these basic principles that have made this country what it is and causes it to be the hope of the rest of the world today.

"The biggest surplus we have today is a surplus of government," the editor said in discussing the state of the agricultural economy "But one thing we don't have a surplus of is understanding between farm people and non-farm people" He suggested that communications would be our greatest farm problem in coming years

As population continues to overtake food production, McMillen said, the constant decline in food prices will level off He cited the need for more and more qualified labor in the future, but suggested that it would not be available He told the mixed audience that all the really good farm land was already in production, although there was some we could bring in at a price. He said that farmers in the future will accelerate the trend of substituting capital, in the form of mechanization, for a vanishing supply of qualified labor

"More people will mean more problems," McMillen said .He predicted increasing consumer fretting over fertilizer and pesticide contamination of farm products, and increasing complaints on offensive barnyard odors He said the farmer of the future will have to be increasingly concerned with prices, assessments, zoning, individual tax management problems, insurance, investments, complicated contractual agreements, and ultimately, computers

"We will need more and more ways to spread understanding," McMillen said He suggested it was increasingly important that farm youths learn how to make a speech, talk in front of radio and television audiences, and learn how to write He said these arts may become far more important to the farm youngster in the future than learning how to show a steer or dairy animal, or the pursuit of other organized teachings that are currently considered important

Preceding McMillen on the program were Samuel A Dum and George W Davis, Jr Dum, a dairyman from East Petersburg, cited some of the statistical changes that have occurred in agriculture since this country's early days He pointed out that the rate of change in agriculture has accelerated continually He contrasted the average capital investment in agriculture — $26,000 per farm worker — with that of industry — $7000 per worker.

Industry and highways have taken land out of agricultural production at the rate of 2000 acres a year for the past 15 years, Dum said

While land can be profitably farmed for some crops at $500 per acre, $1000 per acre land and higher, in Lancaster County is not unusual, the dairyman said

'This discourages expansion of farms to increase efficiency, and makes it nearly impossible for young men to get started in farming here," Dum said.

But, he predicted, in spite of all the pressures of high land cost and labor inaccessibility, Lancaster County agriculture has the potential to remain competitive in meeting the expanding needs of our economy.

Speaking for industry, Davis noted the role of the Lancaster County Industrial Development Bureau, of which he is vice president.

The bureau is authorized to purchase land for later industrial development, Davis said, and it is authorized to attract new industry to the county.

"In Lancaster County we have well-trained people who know how to work," he said, adding that this was a great help in encouraging industry to locate here.

Davis reported that in recent years the bureau had been responsible for bringing 16 new industries to the area. These companies presently employ 1725 people, he said.

Chairman for the evening was Lancaster County agent M M. Smith, who is also chairman of the Chamber's agriculture committee.

Farm Prices In Pa. Up 7%; Off 1½% In U.S.

Prices received by Pennsylvania farmers for their products in October edged up slightly from a month earlier century to a 15 percent decline for the entire nation according to the State Crop Reporting Service

Compared to a year earlier average prices received by Pennsylvania farmers were up 10 percent while the national average was 7 percent above that of mid October 1965

The average price paid by US farmers for commodities and services in October was unchanged from a month earlier, but 5 percent higher than last year

The Pennsylvania price average was strengthened by advances in milk, feed grains hay and vegetables

The price received for milk was up 15 cents a hundredweight from a month earlier — approximately three tenths of a cent a quart The mid October price of $5 80 per cwt was equivalent to approximately 12½ cents a quart

Slight advances were recorded in the prices of oats barley, rye and hay, while potatoes were up 16 cents per cwt over mid-September quotations

Most prices received for livestock declined slightly with hogs off 80 cents per cwt from a month earlier

PP&L Offers 23 Scholarships To Area Schools

Pennsylvania Power & Light Company President Jack K Busby announced this week that PP&L is offering 23 scholarships to high school seniors graduating in the spring of 1967 The scholarships are available at 21 colleges and universities in Central Eastern Pennsylvania to students whose parents reside in the company's service area

"The rapid technological advancements in this country Busby said, "are continually increasing the demand for larger numbers of better trained leaders It is these people who provide the leadership so vital in developing an ever-improving society As opportunities have expanded in recent years, the cost of obtaining a college education has increased, making it a prohibitive factor for a growing number of potential students PP&L offers these students an opportunity to compete for scholarships under its program of aid to higher education

Each of the 21 colleges and universities is responsible for selecting from among all the applicants the recipient of a PP&L scholarship Therefore an applicant is eligible to compete for scholarships only at those institutions, participating in the PP&L program to which he or she has been admitted Of course, a high school senior may apply to more than one service area college for a PP&L scholarship, Busby said

Since the program's inception in 1947, PP&L has assisted 227 young people in their search for a higher education The company's aid to education in the last year exceeded $160,000, including scholarship assistance, contributions to independent colleges and college expansion activities, and matching employee contributions to alumni funds and foundations, according to Busby.

APPLY LIME SIX MONTHS BEFORE NEEDED BY CROPS

Anytime a truck can drive over the ground is a good guide as to when to apply lime, says John Falloon, University of Missouri extension soils specialist.

Ground limestone is most effective, he adds, when applied at least six months before the growing crop needs it.

The exact time is not the important thing with lime applications. More important, says Falloon, is to use it when needed.

He suggests that farmers whose land should be limed for crops next year, make arrangements to have it spread between now and the next few months.

County Guernsey Breeders Annual Meeting Nov. 18

The annual banquet and business meeting of the Lancaster County Guernsey Breeders Association is slated for Friday, November 18, at 6 45 p.m., according to association secretary-treasurer Jesse G. Balmer The affair will once again be held this year at the Rhoad's Spanish Tavern, Quarryville.

Following the ham dinner, a business meeting will include financial and committee reports, presentation of awards, and election of three new directors to three-year terms

The featured speaker for the evening will be Don Spatz, who has a varied background that includes writing assignments for three major radio networks, and past teacher at John Hopkins University

Serving on the association's banquet committee are Robert McSparren, chairman, Jason Weaver, and Earl Linton

Fought Regains Top Steer Title At Exposition

A 975-pound Angus steer shown by Jay W. Fought of Mechanicsburg R2, Cumberland County, became grand champion steer of the 10th Pennsylvania Livestock Exposition Tuesday at the Farm Show Building, Harrisburg. Earlier, Fought's steer had won the Angus championship in the open division.

In regaining the grand champion title he lost at last year's Exposition, Fought had to turn back the junior champion, a 1000-pound Hereford summer yearling shown by David J. Greenbarg of Montgomery County. Greenbarg's entry was named reserve champion of the show by judge Val Brungardt, animal husbandry professor at the University of Wisconsin.

Fighting for the title was not a new experience for Fought. To win it in 1964, he had to first defeat the junior champion, an Angus shown by John Frey of Quarryville R2.

On his way to the Angus class championship, Fought again had to contend with a Lancaster Countian. Veteran showman J. K. Mast, Conestoga Meadow Farms, Morgantown RD, exhibited his 1080-pound Angus to the reserve Angus championship, beating all but Fought's entry.

In the open class Hereford steer show, a senior calf entered by Fred Frey, Quarryville R2, and Rodger Worthington, Emmington, Illinois, won the reserve Hereford championship.

Other breed champion and reserve honors were won by: three was won by Shorthorns Shorthorn, Knic Overpeck, shown by Overpeck; reserve Clinton, Indiana; Cyrus Eaton, honors went to Angus shown Cleveland, Ohio; Charolais, by Conestoga Meadow Farms. Triple EEE Ranch, Gallipolis,

Growing HEIFERS and Dry COWS need

Wayne FITTING RATION

Wayne Fitting Ration produces rugged, full-bodied heifers that are thrifty and ready to breed at an early age. Fitting Ration also helps the dry cow replace flesh lost during the previous lactation and puts her in top condition to start the new milking period at a high level of production.

Bred heifers and dry cows must receive a highly nutritious ration in order to build the unborn calf. Wayne Fitting Ration supplies the vitamins, minerals, proteins and energy needed to drop thrifty, strong-boned calves.

In a test at the Wayne Research Farm, well fitted Holsteins produced 1720 lbs. more milk and 83 lbs. more fat than when not properly fitted.

HERE NOW!

ZEA IIII Funk's G-Hybrids are the product of the most massive research effort ever focused on the improvement of hybrid corn. The result is an extraordinary new group of Single Cross, Special Cross, and 4-Way Cross Hybrids. They are identified by a four numeral variety number. We call the results of this research effort ZEA IIII. Zea for Zea mays, the scientific name for corn . . . IIII for the 4 great areas of corn breeding research which produced the extra performance factors in these great new hybrids:

I Unmatched Yield Power

II Proven for Narrow Rows and High Populations

III Rugged Dependability

IIII Highest Quality Grain

Ask your Hoffman Seed Man to reserve your new ZEA IIII Funk's G-Hybrids now! (Supplies of some are limited)

By Mrs. Richard C. Spence, Food Editor

Fixins' For The Turkey . . .

SPENCE

The modern pre-stuffed turkey eliminates much kitchen work and encourages one to spend a little more time thinking about pretty garnishes; thick orange slices topped with Cranberry-Orange Meringue can be assembled and stored in the freezer. When the roasted turkey is removed from the oven, the orange meringues go into the oven to brown along with the rolls. In the meantime, the stuffing can be spooned into a serving bowl and topped with toasted sliced almonds. The turkey can be pre-carved in the kitchen while still retaining the beauty of the roast turkey for serving at the table. This is done by cutting diagonally into the white meat from the wing joint to the breastbone. Continue slicing the full length of white meat. Then cut down close to the breastbone. At the table, free the thick slices by making a lengthwise cut along the bottom of the slices. Remove and carve the drumsticks and thighs as usual.

CRANBERRY-ORANGE MERINGUES

6 unpeeled orange slices, cut ¾ inch thick
6 teaspoons frozen cranberry-orange relish, thawed and drained
3 egg whites
¼ teaspoon cream of tartar
5 tablespoons sugar
4 tablespoons frozen cranberry-orange relish, thawed and drained

On the day before serving arrange orange slices in a baking pan with very low sides. Place 1 teaspoon cranberry-orange relish in the center of each orange slice. In a deep bowl, let egg whites warm to room temperature, about 1 hour. With mixer at high speed, beat egg whites and cream of tartar until soft peaks form. Gradually beat in sugar, 1 or 2 tablespoons at a time. Continue to beat until stiff peaks form when beater is raised. Gently fold in 4 tablespoons cranberry-orange relish until thoroughly blended. Place a rounded tablespoon of meringue on each orange slice covering relish completely. Freeze overnight. Remove from freezer and bake in a hot oven (400 degrees) 13 to 15 minutes, or until meringue is golden brown. Serve with turkey. 6 servings.

* * * * *

Another garnish to give sparkle to your holiday turkey are these Cranberry Glazed Baked Apples.

CRANBERRY GLAZED BAKED APPLES

6 medium baking apples
6 tablespoons cranberry-orange relish
1 tablespoon cornstarch
½ cup sugar
½ teaspoon cinnamon
¼ teaspoon nutmeg
2 cups cranberry juice cocktail

Core apples and pare one-third of the way down, scalloping edges of apple skins. Fill center of each apple with 1 tablespoon cranberry relish. In a small saucepan mix cornstarch, sugar, cinnamon, and nutmeg. Gradually add cranberry juice and bring to a boil. Cook until clear and thickened, stirring constantly. Place apples in deep baking dish and pour cranberry glaze over them. Bake in a slow oven (325 degrees) 30 minutes, basting with glaze every 10 minutes. Serve as garnish with hot turkey.

* * * *

Here is a delightful accompaniment for your holiday dinner, that's sure to tease the palate — light, refreshing and spiced just right to go along with roast beef, turkey or ham.

THOMAS

Sewing Durable Press Fabrics

Retailers are now selling durable press yard goods For home sewing, keep these points in mind

Interfacings, zippers, tapes, and linings should have the same shrinkage characteristics as the garment fabric.

Seams in the filling direction can be sewn with less pucker than those on the warp

Bias seams show less pucker than seams cut on the straight grain

Top stitching adds pucker problems

Use a clean, well-adjusted machine with the lowest thread tension possible consistent with good sewability.

Select Quality Carpets & Rugs

It is possible to get a poor quality or a good quality carpet in any fiber. Look for these indications of quality. Quality is measured by the depth and density of the pile. Look for closeness of weave. This refers to the number of

tically unchanged from last year and will average about one-half of the cost of carrying out such conservation practices as establishing and improving vegetative cover, planting trees and practices aimed at the conservation and more efficient use of water

Fifteen percent of this year's fund is set aside for new farms — that is, farms not previously enrolled in the program — and for beautification practices

The county ASCS office announced that handbooks outlining practices eligible for the cost-share program will be available soon.

● State Holstein

(Continued from Page 1)

Philadelphia He will discuss "Modern Law for Modern Society"

Other speakers will be featured Friday in addresses and a panel discussion They include W R Brooks, Paclamar Farms, Louisville, Colorado, John R Snoddy, Holstein breeder from Salem, Ohio, Dr Wyndham Blanton, Cumva Farms, Farmville, Virginia

In addition to the speakers, the convention program will also feature a special ladies program and a free bus tour The ladies activities will include a visit to Freedoms Foundation at Valley Forge, and a luncheon at the George Washington Motor Lodge

The bus tour, planned for 1:30 p.m. Thursday, will visit Longwood Gardens, Buck and Doe Run Valley Farms, and a Chester County mushroom farm.

● Inter-State

(Continued from Page 1)

pondent, as banquet speaker. Pearson, who also operates a dairy farm and is a member of the Maryland and Virginia Milk Producers Association, is an important figure in the Washington news media, Inter-State said.

Inter-State has some 3500 dairy farmer-members divided into 26 districts in Delaware, Maryland, New Jersey and Pennsylvania. These districts, in turn, are divided into 79 locals, whose 115 delegates will vote on resolutions and transact new business at Wednesday's session.

The sessions on Tuesday, November 15, will be devoted to reports by F. Bennett Carter, president; Dr. James E. Honan, general manager; Clara Gallagher, secretary; Florence Schultz, treasurer; Dr. Paul E. Hand, assistant secretary-treasurer and economist; Golden W. Davis, management assistant; A. Evans Kephart, counsel; and Boyd C. Gartley, director, member and public relations.

Tuesday's banquet for approximately 600 members and guests of Inter-State, will also feature entertainment provided by Sascha Tormas, a show-stopping violinist. William H. Johnson, director of public relations, Farm Credit Banks of Baltimore, Md., will be toastmaster.

A special ladies meeting on Tuesday morning, November 15, will offer wives of delegates a program consisting of a demonstration on Christmas arrangements by Mrs. Mary Jane Mowrer, Paradise, and an illustrated program entitled "Breath of Life" conducted by the Bell Telephone Company.

Members of the Annual Meeting Committee are: vice president Wilbur Seigt; directors William M Brinsfield, Robert E. Waddington and Ellwood B. Gruwell; and general manager James E. Honan.

● Farm & Home

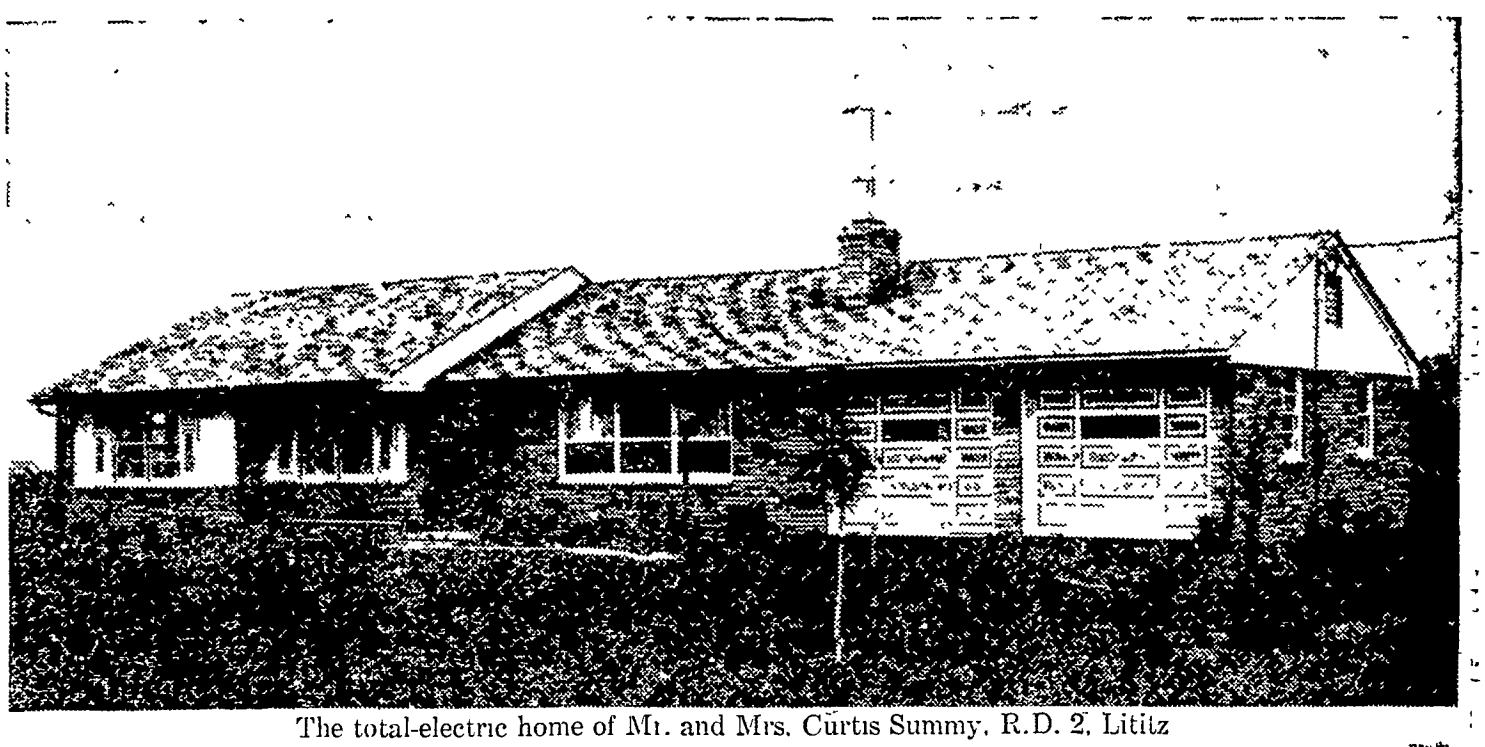
authorize the officers to let the building contract.

It is also anticipated that construction of the Center will begin at the site along the Route 30 Bypass in the near future.

FARM WOMEN NO. 14 MEET AT LUNCHEON

Farm Womens Society No. 14 met Wednesday, November 9, at the Groff Banquet Hall, Mount Joy R1, for a luncheon and homemade candy demonstration. Thirty-eight members and guests were present. Devotions were in charge of Mrs. Harold Groff. A report was given by Mrs. Charles Leaman on the Society's Korean orphan. Hostesses were Mrs. Groff, Mrs. Ira Kreider and Mrs. Charles Murray.

The December meeting will be a banquet with husbands as guests at the Bethel Church, 2100 Manor Ridge Drive, December 7 at 6:30 p.m. A film "Millionaires Club" will be shown by the Cancer Society.



The total-electric home of Mr. and Mrs. Curtis Summy, R.D. 2, Lititz

We asked the Curtis Summys:

Is total electric living as low-cost as we promised?

Their answer:

Yes! We paid just $35.24 a month last year for everything, *including* electric heating!

This low cost also included electric water heating, cooking, laundering, lighting, and all their other electric services.

That's why we say, to make a true comparison of the total costs of home heat and operating all your work-saving appliances, you must add together *all* costs.

With total electric living, for instance, there's just one service, one bill and no expensive maintenance contracts. But to get the true cost of flame-type heat, you must add together the fuel bill, the electric bill and the service contract. Put them all together and you'll see why we say live the total electric way as the Summys do.

IF YOU ARE BUILDING — be sure to tell your builder you want to be modern, you want the best, you want electric heat.

IF YOU ARE REMODELING — call a Reddy Kilowatt Recommended Electric Home Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."

Livestock Exposition

(Continued from Page 1)

for the title of reserve grand champion steer of the Livestock Exposition.

In the junior division Hereford class, Bob Davis of Bedford County took the reserve championship. Last year, his older brother Bill swept the junior and open divisions for the top steer title of the Exposition. Bob Davis, then nine-years old and with no showing experience, will long be remembered by anyone who attended the 1966 State Farm Show last January At the last minute, Bob stepped in to pinch-hit for Bill, who was ailing, and showed his brother's steer all the way to Farm Show championship

Shorthorn titles went to a senior calf shown by Belinda Myers, Ohio, and to a York County summer yearling owned by George W. Dutrey, Jr., Lewisberry.

Although Lancaster County showmen didn't completely regain the winning ways which gave them a sweep of the junior steer division in the 1964 Exposition — when, led by John Frey, Quarryville R2, and Wesley Mast, Elverson R2, they took every major title except reserve champion Shorthorn — they started up the long comeback trail this year by considerably bettering last year's performance

Four Directors Named To Farm Credit Assns.

At the annual stockholders meeting of the Lancaster Farm Credit Associations held Thursday at Hostetter's Banquet Hall, Mount Joy, four directors were elected by the approximately 300 persons attending.

Named to the Federal Land Bank board were: Richard B. Lefever, Quarryville R1; and Samuel B. Williams, Jr., Middletown. Elected to the Production Credit board were J. Homer Graybill, Manheim R3; and Elvin Hess, Jr, Strasburg R1.

The Lancaster Farm Credit Associations serve Lancaster, Dauphin and Lebanon Counties.

The board reported to the stockholders that to date this year 52 loans, totaling $1,471,505, had been made. The association now has $9,928,000 outstanding to 494 members, compared to $8,879,000 outstanding last year.

Guest speaker at the luncheon was P. Robert Dougherty, assistant vice president of Federal Land Bank and Federal Intermediate Credit Bank of Baltimore. Dougherty spoke of the present short money situation, and explained how Farm Credit will have enough to take care of the farmer and part-time farmer for all his needs.

Champion Steer Brings 90c At Livestock Exp.

The grand champion steer of the Pennsylvania Livestock Exposition, a 1,015-pound Angus, brought 90 cents a pound at the Thursday afternoon auction. It was shown by Jay W Fought, of Mechanicsburg R2, Cumberland County, and was purchased by Daniel W George, of George's Foodliner, Bethlehem. Last year's champion brought $2 25 a pound and the 1964 winner, another Angus shown by Fought, brought $1.15 a pound.

The grand champion beef carcass, weighing 512 pounds, shown by Jay Coble, of Locust Lane Farm, Hershey R1, brought $1 10 a pound—five cents more a pound than Coble's champion Angus carcass that was sold last year

The champion lamb carcass, a Hampshire weighing 59 pounds and shown by Jack Shober of Somerset County, was sold for $1 75 a pound to Kunzler & Co, of Lancaster Last year's champion lamb carcass brought $1 25 a pound

The champion barrow went for $1 05 a pound to Albogast and Bastian, of Allentown It was exhibited by Caryol Smith, of Jamestown, Ohio

The champion wether, a 105-pound Southdown shown by Kenneth Mosher, of Cardington, Ohio, was sold to Daniel W. George for 60 cents a pound.

● Have You Heard

(Continued from Page 11)

tufts or loops in the rug.

Bend the surface of the rug. There should be no wide gaps between the rows of pile. Yarns support each other and resist abrasion in a rug with closely packed tufts.

Height of the pile adds to durability. If you compare rugs of the same quality of fiber and size of yarn, the rug with more fiber will wear better.

Use top grades in heavy traffic areas. Economy grade rugs or carpets can be used in rooms you use less.

To oil hard to get at places, put a paper straw over the spout of your oil can. Bend and shape the straw to fit.

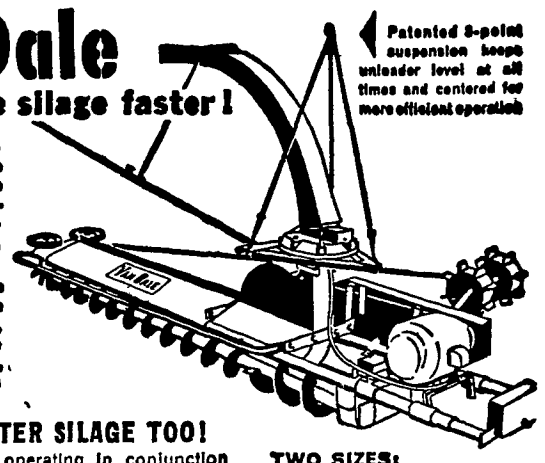
Get the BIG silo unloader value!

VanDale
Delivers more silage faster!



- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.
- Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

DELIVERS BETTER SILAGE TOO!
The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 16'
Heavy Duty—for silos 18' to 30'

THREE FARMS
to be held
FRIDAY, NOVEMBER 25, 1966
Sale will be held at Farm #2.

Located 8 miles Northwest of Manheim, between Mastersonville and Colebrook, off the Colebrook Road, Rapho Twp., Lancaster Co., Penna.

FARM #1

78 ACRES, more or less, 60 acres under cultivation, 4 acres woodland with good road frontage, 14 acres meadow with stream. LARGE BANK BARN suitable for steers. Corn and tobacco shed, room for 6 acres of tobacco. 4-car garage.

FARM #2

13 ACRES, more or less, 8 acres under cultivation, 5 acres meadow and woodland. FRAME BARN, tobacco shed, and stripping room. 3-car garage. 2-story 20 x 100 ft. chicken house. 2½ STORY FRAME DWELLING containing 8 rooms with Asbestos Siding. Extra dwelling — cement block — 24 x 24 ft. Used for dwelling. Good road frontage. This farm has an outstanding spring of water.

FARM #3

62 ACRES, more or less, 40 acres under cultivation, 15 acres meadow with stream, 7 acres woodland. 2½ STORY STONE HOUSE. BANK BARN and tobacco shed. Room for 5 acres of tobacco. Stripping room & dampening cellar. This is a good steer farm with lots of road frontage.

Farms #1 and #2 are joining and can be farmed together. These 3 farms are good producing farms. Ideal for chickens, steers, and tobacco.

Persons wishing to view property may do so anytime on or before day of sale. Sale to begin at 2 P.M. when terms and conditions will be made known by:

Some Gave Up and Cried, Others Tried A Classified In Lancaster Farming

Keystone Hybrids

IS THE SMALL FLOCKOWNER GETTING HIS PULLET CHICKS AT THE SAME PRICE AS THE BIG "EGG FACTORY" OPERATOR?

WELL, USUALLY NOT.

BUT HE CAN IF HE ORDERS HIS CHICKS FROM US. BECAUSE WE CATER TO THE SMALL AND MIDDLE-SIZED POULTRYMEN.

And not only do we keep the price down, but we also give them a "top-notch" pullet that can perform with the best in the land, regardless of how high a price.

Our K-1700 Hybrids have been field-tested and entered in the Pa. Laying Test over the past two years and they came through with a very high performance.

We are now booking K-1700 Hybrid chicks for the 1967 season at $25.00 per 100 pullet chicks, delivered. No extra charge for debeaking or dubbing.

Test a sample pen of K-1700 Hybrids against a pen of Hylines, DeKalbs, Babcocks, Shavers, Kimbers, Garbers, Ghostleys or any other pullets of your choice.

FIGURE for YOURSELF, THINK for YOURSELF and then make your OWN decision.

During the daytime hours of 7:00 A.M. to 5:30 P.M. we have authorized Charles E. Sauder & Sons, Phone 445-3931, to accept chick orders by phone.

Hornco Feeds - The Growing Choice Of Business Farmers

National Milk Champion

Sinking Springs Farms - Ivan Bright

31820 Lbs. Milk 1216 Lbs. Fat

HER RECORD (To Date)

Jr. 2 Yr. Old — 365 Days - 2X 23770 Milk 887 Fat
Jr. 3 Yr. Old — 305 Days - 2X 25600 Milk 933 Fat — National Milk Champion
Jr. 4 Yr. Old — 365 Days - 2X 31820 Milk 1216 Fat — National Milk Champion

The excellent records of Ivan Bright proves that Good Cows, Good Management and Good Feed make Great Partners. Bright was fed on Hornco Uni-Pel Flaked Dairy Feed which was developed by D. H. Van Pelt. Hornco Uni-Pel Dairy Feeds are formulated to protect herd health, minimize breeding problems and obtain top production. Incidentally the 62 cow herd average at Sinking Springs Farms this past year was 19,083 lbs. Milk and 696 lbs. Fat. This excellent herd was fed exclusively on Hornco Uni-Pel Flaked Dairy.

HORNCO FEEDS

MORE DAIRYMEN ARE FEEDING HORNCO UNI-PEL DAIRY FEEDS THAN EVER BEFORE. WHY NOT CHECK WITH ONE OF YOUR NEIGHBORS WHO CHANGED TO HORNCO?

D. E. Horn & Co., Inc. York, Pa. Ph. 854-7867
